

Common Fluent Shelf Carton Flow Racking Made of Q235 Material at Nanjing for Everyday

Our Product Introduction

for more products please visit us on warehouse-rackings.com

Basic Information

Product Specification

- Model NO.: QIFEI-012
- Material: Steel
- Structure: Drive In Rack
- Type: Multi-Level Racking
- Mobility: Adjustable
- Height: 0-5m
- Weight: 500kg
- Closed: Open
- Development: Conventional
- Serviceability: Common Use
- Color: Customized
- Lead Time: 15 Days
- Raw Material: Q235
- Surface Treatment: Powder Coating
- Transport Package: Safe

Product Description

***Note: The specifications, sizes, colors and surface treatments of the products can be customized!**

Fluent Shelf

1. Overview of Fluent Shelf

Fluent shelves are equivalent to fluent shelves. Products are often evolved from medium-sized cross-beam shelves. Goods are transported from the distribution terminal to the pick-up terminal through raceways. Goods slide automatically by means of gravity. First-in-first-out operation can be realized with low cost, fast storage and high density. Usually used in the enterprise's lean production line operation.

Fluent shelves generally use roller-type aluminum alloy or sheet metal fluent bar, which is placed on a certain slope (about 3 degrees). Goods are usually packed in paper or placed in plastic swing boxes, using their self-weight to realize the flow of goods and first in first out. Goods are transported by car, accessed manually and accessed conveniently. The load of each layer of unit shelf is usually about 100KG, the height of shelf is less than 2.5 meters, and products are placed in several compartments.

It is suitable for process conversion on both sides of assembly line, assembly line production, sorting operation in distribution center, etc. It can be equipped with electronic tags to realize information management of goods. It is widely used in automotive, pharmaceutical, chemical and electronic industries.

2. Fluent shelf characteristics

1. Roller-type aluminium alloy and other flow bars are used to realize the first-in-first-out of cargo by the weight of cargo.
2. Easy access, suitable for both sides of assembly line, distribution center and other places.
3. It is suitable for the storage of large quantities of similar goods with high space utilization, and it is suitable for the use of auto parts factories.
4. Electronic labels can be used to realize the information management of goods.

Packaging & Shipping

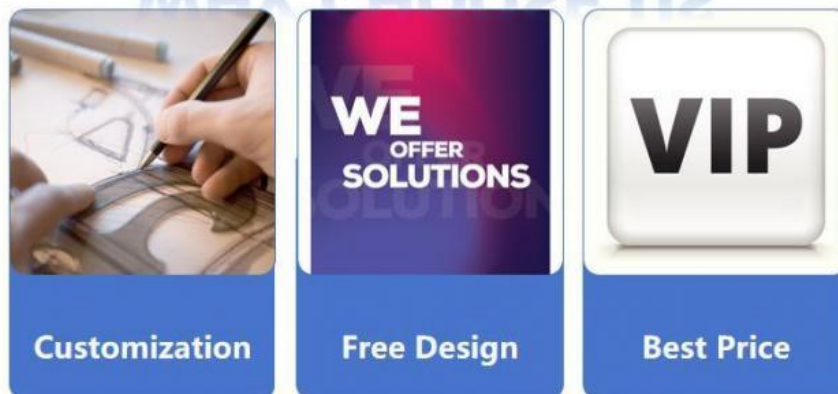

Company Profile

Jiangsu Qifei Intelligent Storage Equipment Co., Ltd., established in 2020, is one of the leading manufacturer which specialized in designing & manufacturing industrial warehouse storage racks, automation warehouse system and professional logistics equipment, we aim to provide cost-effective and space utilization storage solutions for all customers worldwide . We have powerful R&D teams, including 8 experienced design engineers. Qifei's workshop equipped with 6 automatic production lines of rolling and curved steel and two static powder coating lines, which ensures the high quality of our products. All our products and operation are ISO:9001 certified , and all our racks / shelving are approved by SGS company . Our main products are heavy duty rack, medium duty rack, light duty rack, cantilever rack, mezzanine floor, drive in rack, and so on.

Welcome to visit our company.

WHY CHOOSE US
