Basic Information

Product Specification

- Model NO.: QF-Gravity Pallet Rack
- Type: Pallet Racking
- Mobility: Fixed
- Height: 5-15m
- Closed: Semi-closed
- Development: New Type
- Serviceability: Common Use
- Color: Customized
- Lead Time: 20 Days
- Raw Material: Q235B
- Surface Treatment: Galvanized/Powder Coating
- Transport Package: Standard Export Packing
- Specification: Customized
- Trademark: Customized
- Origin: China

Product Description

Whatever you need, Qifei has all the products and solutions, to make the most out of every section of available space in your storage area.

If you don't know what you're looking for, just contact us.

Product Description

Pallet Flow Racking, or 'Pallet Live Storage' is ideal if you operate a First-in, First-out (FIFO) goods storage setup.

With this system you can use up to 60% less space than if you were to use conventional pallet racking.

Our Pallet Flow system offers a dynamic storage solution with integrated conveyor modules to suit most pallet types and sizes. It's well-suited for the drinks industry or as a buffer storage facility in manufacturing.

Dimensions
1000mm (1 lane)
2000mm (2 lanes)
3600mm (3 lanes)
Block Height: Up to 13500mm

Channel Depth: Up to 15 pallets deep

- 2, Length, Height, and Width of the warehouse.
- 3, Layers of the racking
- 4, Pallet size.
- 5, Max weight of pallet with cargo on.
- 6, Color requirement.

Detailed Photos

Pallets travel smoothly on full-width or twin-track rollers. While the front pallet is removed on the front side of the rack, the rear pallet is held back. Pallet movement is always safe and smooth thanks to automatic braking, along with a combined load guide and end stop unit.

Pallet Flow Racking offers the following features and benefits as standard:

Dedicated load and retrieval means only two forklift truck aisles are required
Uses up to 60% less floor space than conventional pallet racking
FIFO operation - for automatic stock rotation
Faster, more efficient warehouse picking speeds

By using roller system or pallets with roller and under the influence of gravity, "first in and first out" for the goods is achieved

The surface is sprayed with thermo-setting powder, which is beautiful and elegant

The installation and connection of the upright post and the cross beam are simple and stable.

When the baffle is tilted, the goods at the end are separated from the goods behind.

The frame and roller are easy to install and adjustable.

The goods slide smoothly without deviation.

Adjust the sliding speed of goods through the pull rod.
