Product Description

Pallet Flow Racking, or 'Pallet Live Storage' is ideal if you operate a First-in, First-out (FIFO) goods storage setup.

With this system you can use up to 60% less space than if you were to use conventional pallet racking.

Our Pallet Flow system offers a dynamic storage solution with integrated conveyor modules to suit most pallet types and sizes. It's well-suited for the drinks industry or as a buffer storage facility in manufacturing.

Fluent shelf structure

By using roller system or pallets with roller and under the influence of gravity,"first in and first out" for the goods is achieved

Fluent shelf saves labor and improves work efficiency

Fluent shelf are high density dynamic storage systems that increase flexibility and maintain the First-In / First-Out product flow from the stocking aisle to the picking aisle therefore increasing efficiency. fluent shelf permits dense storage by eliminating all aisles except the entrance and exit aisles.

Exceptional use of space

Suitable for mass storage of similar goods, with plastic or carton use, high spaceutilization rate,widely used in manufacturing, commercial.,assembly workshops and warehouses with high delivery frequency
